Parent Volunteer Responsibilities
For St George's Pool

The following outlines the responsibilities of our parent volunteers who are assisting with our COVID-related training protocols at the St. George's Pool

One parent volunteer must be present at the start of each practice. Our Volunteer Coordinator will prepare a volunteering schedule covering all practices. Practice will not proceed without assigned parent volunteer present.

Before Arriving at the Pool Facility

Before arriving at the pool, the volunteer parents must:

1. Electronically complete the BC COVID-19 Self-Assessment Tool Health Screen within 24 hours of coming to each practice.
2. Self-assess with the VIK COVID symptoms question:
Have you or anyone in your household been experiencing any of the COVID symptoms (such as fever, chills, cough or worsening chronic cough, loss of sense of smell, diarrhea, nausea & vomiting) in the last 14 days?
If the answer is Yes, the volunteer is not allowed to volunteer (unless a recent negative COVID test is provided)
3. **If a volunteer answers "yes" to any of the questions above or is unable to attend the duty, she/he cannot volunteer and has to find a replacement family from the same practice group and update the Vikings Volunteer Coordinator with the new volunteer/swimmer name ASAP.** Practice will not proceed without assigned parent volunteer present at SGS.

On-Site at the Pool Facility

When on-site, the volunteer must:

1. Wear a mask at all times. (Swimmers are also required to wear a mask when entering and exiting the pool facility.)
2. Arrive 15 minutes prior to the practice, check-in with the on-duty VIK Coach. Answer on-site screening questions from the coach. Wait for swimmers on the street of W29th Avenue outside of the St. George' Pool.
3. Ensure no parents drive on to the school property. Redirect them back out onto the street if they do so while the coach is taking attendance and doing the on-site screening questions.
4. Monitor the flow / line-up of swimmers and ensure that they are engaging in social distancing (minimum 6 feet apart) outside and as they enter the facility.
5. Join the coach and the swimmers while the coach leads the swimmers into the pool 5 minutes before practice starts.
6. Remain on-site throughout the practice to assist the coach / lifeguard with any illness situation that arises.
7. If a swimmer becomes ill during practice, ensure the swimmer is wearing a mask (the swimmer's own mask or one provided by the coach), contact their parent (the coach will provide the parents' contact number) and wait with the swimmer until the parent arrives to take the swimmer home.
8. Assist the Coach to monitor swimmers exiting the pool facility, ensuring they maintain social distancing and that all swimmers who attended practice exit the building.
